

GUARANTEE

Aura Long Life Eco Solutions

Aura Light International AB, Karlskrona (Sweden), grants a guarantee for all installed
Aura Long Life Eco Solutions

This guarantee is valid for all installations fulfilling the relevant norms. The guarantee is granted for the lifetime of the components based on a 12 h switching cycle (11 h on, 1 h off).

| Eco Solution | Components included | Lifetime (12 h) (1 year = 4000h) |
|--|--|--|
| Aura Eco Solution for Signage | Aura T8 Long Life fluorescent lamp, Elmetec ballast, Elmetec controller | 10 years (40 000h) |
| Aura Eco Solution for Street Lighting | Aura SODINETTE SE, TridonicAtco ignitor (ZRM 80/50 & ZRM 125/70) | 8 years (32 000h) |
| Aura Eco Solution for Cooling Cabinets | Aura THERMO 5°C lamp, Helvar L18TL2 ballast, Aura T4 starter | 9 years (36 000h) |

The 12h-switching cycle is defined based on the time when 10 % of the components in an installation are failed. The lumen depreciation at this time is indicated with less than 10 % of the initial luminous flux (100 h - value).

When the failure rate (electrical) is more than 10 % within the guaranteed lifetime the defect components above 10 % will be compensated free of charge. A claim for damages cannot be constituted based on this guarantee.

The validity of the guarantee is based on the following conditions:

1. Operating the Aura Eco Solution with accessories complying with relevant IEC/EN standards.
2. After announcement every defect lamp has to be returned to Aura Light for a test in the Aura laboratory. Only failures confirmed by the laboratory test will lead to a guarantee compensation.
3. Installation costs for lamp replacement within the guaranteed lifetime have to be carried by the user.
4. The guarantee is valid from day of use which has to be recorded by the user.
